

Datain: Unlock the Power of Your Data with Datain.

“

Together, we turn data into a competitive advantage

Features and Benefits of the Combined Solution

Real-time Data Integration: Our platform seamlessly integrates with Denodo to provide real-time data ingestion and transformation, enabling customers to analyze and act on data as it's generated.

Enhanced Data Governance: Denodo's data catalog and lineage capabilities complement our platform's streaming capabilities, providing a comprehensive view of data flows and ensuring data quality and compliance.

Optimized Data Analytics: By combining our real-time data streaming with Denodo's data virtualization, customers can easily access and analyze data from various sources, enabling faster insights and more informed decision-making.

Scalability and Performance: The combined solution offers high performance and scalability, handling large volumes of data in real time and adapting to changing business needs.

Datain empowers businesses to unlock the full potential of their data. We deliver premium, end-to-end data solutions tailored to your specific needs. Our deep industry expertise ensures we can solve any data challenge you face.

What Business Challenges Are Solved?

We break down data silos using the Denodo Platform and Data Mesh principles, making your data readily accessible. We've delivered numerous self-service solutions and built data catalogs for large enterprises

Our Solution

Datain specializes in data consultation and advisory services, use cases road mapping, building and optimizing pipeline, and insightful reports and dashboards.

With experience working in several data platforms, including Cloudera, SAP, Teradata, and Snowflake, we specialize in data analytics use cases, specifically overlaying the Denodo Platform to enable real business users with practical semantic and business layers.

About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading data integration, management, and delivery platform using a logical approach to enable self-service BI, data science, hybrid/multi-cloud data integration, and enterprise data services. Realizing more than 400% ROI and millions of dollars in benefits, Denodo's customers across large enterprises and mid-market companies in 30+ industries have received payback in less than 6 months.

PRODUCT OVERVIEW

The Denodo Platform leverages data virtualization to seamlessly implement a logical data architecture, employing modern features such as semantic data layers, metadata management, a recommendation based, user friendly data catalog, and hybrid, multi-cloud deployment options to break down the boundaries separating applications, data, clouds, and people to support the government's mission, IT transformation initiatives, and mandates.

SOLUTION HIGHLIGHTS

<6 months
payback

65% faster than
ETL

30% less data
preparation

What Are the Features and Benefits of the Combined Solution?

By leveraging Denodo's data virtualization capabilities, Datin can provide customers with a more flexible, scalable, and efficient data solution. Here's how:

Simplified Data Access: Data virtualization creates a unified view of data from various sources, making it easier for users to access and analyze information without needing to understand the underlying complexities of the data infrastructure.

Improved Data Governance: Denodo's data catalog and lineage features help ensure data quality, consistency, and compliance. This is especially valuable in organizations with complex data landscapes.

Enhanced Performance: Data virtualization can optimize data access and query performance, especially for complex analytical workloads. This enables faster insights and more efficient decision-making.

About Us

Datin is a leading provider of Data end-to-end solutions. With a focus on Data Services we offer innovative solutions to help businesses and entities to be data driven achieve specific goals or solve particular problems.
