Operations Quick Start Module

Objective

The Operations Quick Start Module is designed for any company that needs support for the initial installa-tion and definition of basic operations processes with the Denodo Platform.

The goal is to set up an environment to start deployment and to provide a guide of administration actions for the administrators.

Benefits

- Get a starting point for understanding general operations processes
- Learn best practices and techniques concerning administration tasks

Description

An experienced Denodo engineer will consult with your Denodo and server administration teams at the beginning of your project, guiding operations processes and accelerating the teams' learning curves.

Defining a plan, aligning the data with business logic, and involving the appropriate resources while doing this, will provide your company with better understanding and usage of the data.

Intended Audience

This module is for both server and Denodo administrators.

Duration

Typical duration is 1 week (5 days)

Key Activities

- Installation, update, and configuration of up to 3 servers (typically production, staging, and develop-ment environments)
- Testing of the installation including testing of different Denodo modules.
- Development of a security strategy
- Review of administration best practices and help to perform the initial setup for backups, monitoring, and promotion to other environments

Key Deliverables

- Documentation of the installation tests
- A ready-to-use environment, configured
- Best practices for operations of a data virtualization infrastructure

Mode of Delivery

Onsite/Offsite Consulting Services
